Pulkit Nagpal

Software Engineer (Frontend)

Inventive Frontend Developer with 2.5 years of broad expertise in Javascript/ES6/ES2017 to build scalable and responsive websites using React, Redux, HTML, CSS, SCSS, NodeJs, GraphQL. Passionate about Javascript and learning it inside out.

WORK EXPERIENCE

Software Engineer II

Studypad India Pvt Ltd.

01/2020 - Present

e-learning platform for kids

- Website Revamp - Built new website from scratch using React, NextJs, SCSS and styled components and moved the existing functionality from ROR Slim to React.
- Optimised page speed by reducing the webpack bundle size with the help of lazy loading and code splitting for new website CSR version.
- Worked on optimising SEO by using prerender.io.
- HappyAtHome Project - Technologies used JQuery, HTML, CSS and leafletJS for building custom maps to show moods of kids around the world during coronavirus.
- Worked on B2C side of product - Daily maintenance of code, debugging issues and coordinating with design and games team and solving customer problems.

Software Engineer

Seekify

06/2019 - 01/2020

Business Productivity SaaS Platform.

- Member of a small front-end team responsible for developing Learning Management System application from scratch for an early stage start-up using React and Redux.
- Built stable and maintainable learner side module with core features like role and plan based rendering, mobile responsiveness, full screen view for slides, pagination, filter based rendering etc.
- Worked on admin side content creation module which includes features like uploading files and text editor to make beautiful slides.

Senior Software Engineer

Capgemini India Pvt Ltd.

07/2018 - 05/2019

- Worked for Netherlands based client ABN AMRO as a software developer - Part of Financial Profile Team - Developed widgets using AngularJS, Javascript and CSS.
- Experience of working in Agile based projects.
