# Pulkit Nagpal

## Senior Software Engineer (Frontend)

Inventive Frontend Developer and a Tech Blogger with 3 years of broad expertise in Javascript/ES6/ES2017 to build scalable and responsive websites. Passionate about Javascript and learning it inside out.

## WORK EXPERIENCE

### Senior Software Engineer I Studypad India Pvt Ltd.

01/2020 - Present

Gurgaon, India

e-learning platform for kids

#### Achievements/Tasks

- Built stable and maintainable codebases using React and Typescript.
- Rebuilt the website using React, Redux, SCSS, and styled-components and moved the existing functionality from ROR Slim to React.
- Optimized page speed by reducing the webpack bundle sizes with the help of lazy loading and code splitting.
- Developed a Form Filler chrome extension for the web team reducing form filling time significantly during development and testing.
- Solely handled development and maintenance of Splashcourses developed using Thinkific on the frontend, Zoho, and Zapier on the backend.
- Developed a project using JQuery and leafletJS for building custom maps to show moods of kids around the world during coronavirus.
- Automated some workflows which increased the efficiency of the Operations team and also the speed of business.
- Worked on B2C side of product - Daily maintenance of code and debugging issues.

### Software Engineer Seekify

06/2019 - 01/2020

Gurgaon, India

Business Productivity SaaS Platform.

#### Achievements/Tasks

- Member of a small front-end team responsible for developing Learning Management System application from scratch for an early-stage start-up using React and Redux.
- Worked on admin side content creation module which includes features like uploading files and a text editor to make beautiful slides.
- Worked directly with the CEO of the company to develop technical solutions for business cases.

### Senior Software Engineer Capgemini India Pvt Ltd.

07/2018 - 05/2019

Hyderabad, India

#### Achievements/Tasks

- Worked for Netherlands-based bank client ABN AMRO as a software developer - Part of Financial Profile Team - Developed widgets using AngularJS, Javascript, and CSS.
- Developed a meeting scheduler App for internal employees using Angular, NodeJS, and MongoDB.
- Experience in working with agile-based projects.
